CELL PHONE

WHAT WILL THIS PROGRESSION DO?

This tech progression enables controlled failure. It allows a slow development of **healthy adult patterns*** of use.

Every level should be showing healthy use before moving on to the next progression.

Together parents set an age and the child can move on after proving aptitude at each level.

*Healthy Adult Use:

- Balance: home responsibilities, school/work, recreation.
- Use with a purpose: Have a reason beforehand.
- Use isn't hidden: No incognito browsing, VPN's.
